

PANAGORAGROUP

MAKING OUR WORLD A BETTER PLACE FOR GOOD

Panagora Group is a social enterprise dedicated to providing high-quality, high-impact technical assistance for global health, development, and learning.

We are a dynamic woman-owned and employee-owned small business focused on implementing market-based and integrated local solutions that strengthen country capacity and self-reliance; and on using learning, communications, and technology to accelerate and heighten impact.

We use highly participatory approaches to mobilize community, civil society, and government stakeholders in defining and owning solutions, and to promote inclusive development.

Throughout our work, we embrace a virtuous cycle of knowledge stewardship, collaborative learning, and application of evidence that result in positive health and development outcomes.

OUR EXPERTISE AND SERVICES

We offer an array of global health, international development, and learning services across a wide range of technical and cross-cutting areas. Our experts can provide short-term or long-term technical assistance in-country or in Washington, D.C., through institutional support mechanisms.

ABOUT THE FOUNDER

Betsy Bassan brings over 30 years of experience as an innovator in the international development field across a variety of sectors with hands-on experience across Africa, Asia, Europe and Eurasia, and the Middle East. She has a proven track record of transformational leadership, spurring teams to achieve ambitious strategies in pragmatic ways, from policy advocacy in Washington, D.C., to community-level programming in partner countries. Betsy Bassan is a 2021 Ernst & Young Entrepreneur of the Year for the Mid-Atlantic region and a 2020 Enterprising Woman of the Year Awardee.

“Pan” means all and “agora” is the city center. Panagora: an inclusive space where ideas bubble and the best ones thrive and spread.

We believe that working with and strengthening local partners must be central to all our work. With every new activity, we leverage the power of local NGOs, private companies, and government agencies to implement solutions that stick.
